

WE'RE HIRING!

STUDENT ASSISTANT WANTED

Human-AI Interaction Research • HCD Department

ABOUT THE POSITION

We are looking for a **master-level student assistant** interested in **mixed methods, qualitative analysis, and speculative design** with a passion for **Human-AI interaction**. Help us find interesting patterns around how design students use language models for prototyping tangible interactions.

WHAT YOU'LL DO

- Analyze conversation logs between AI and users
- Work with agent instructions, prompts, and workshop data
- Discover patterns in Human-AI interaction
- Contribute to research on tangible interaction prototyping

DETAILS

- **Hours:** 30 – 50 hours total
- **Level:** Master student
- **Team:** Works closely with supervisors
- **Compensation:** Paid position
